

DataPort

PRESENTATION

Introduction to DataPort

DataPort is an essential platform for carriers, charterers, and freight forwarders who require **accurate and up-to-date information on Brazilian ports and cargo movements**. With a modern and intuitive interface, DataPort consolidates the latest and most reliable data, helping its subscribers make **strategic and operational decisions in their daily activities**.

How does It Work?

Through solid partnerships with shipping agencies, port terminals, data providers and the ports themselves, **DataPort ensures that information is updated quickly and efficiently.** This gives our subscribers exclusive, consolidated, and real-time access to **berthing queues (LineUp)**, along with the **latest news and updates from Brazilian ports.**

**Let DataPort gather the most reliable
and up-to-date information for you,
consolidated and accessible
with just a few clicks**

Module

Port Information

Terminal information

Details about location, access (land and sea), operational contacts, and information on available terminals and berths.

Berths information

Loading/unloading capacity by commodity, technical specifications, operational restrictions, available equipment, and more.

Available Services

Discover all services offered by each port to avoid unexpected surprises.

News

Stay updated on major events at the ports.

Weather Forecast

Real-time integrated weather data, with detailed forecasts for the upcoming days.

Module

LineUp

Gain access to accurate and up-to-date information on all loading and unloading operations, including those scheduled to dock.

LineUp provides data such as ETA, type of cargo, charterer, receiver, and much more, all in one place.

DataPort:
**Your reliable and up-to-date
source of information for
port operations in Brazil**
