

DocsApp

PRESENTATION

Introduction to DocsApp

DocsApp is a well-established digital solution for over four years, designed to meet the needs of the port logistics market. The platform is used by renowned clients such as Lachmann Shipping Agency, one of the world's largest Shipowners, and two Terminals in São Paulo. DocsApp has facilitated document release for over seven Maritime Carriers with high customer and user satisfaction.

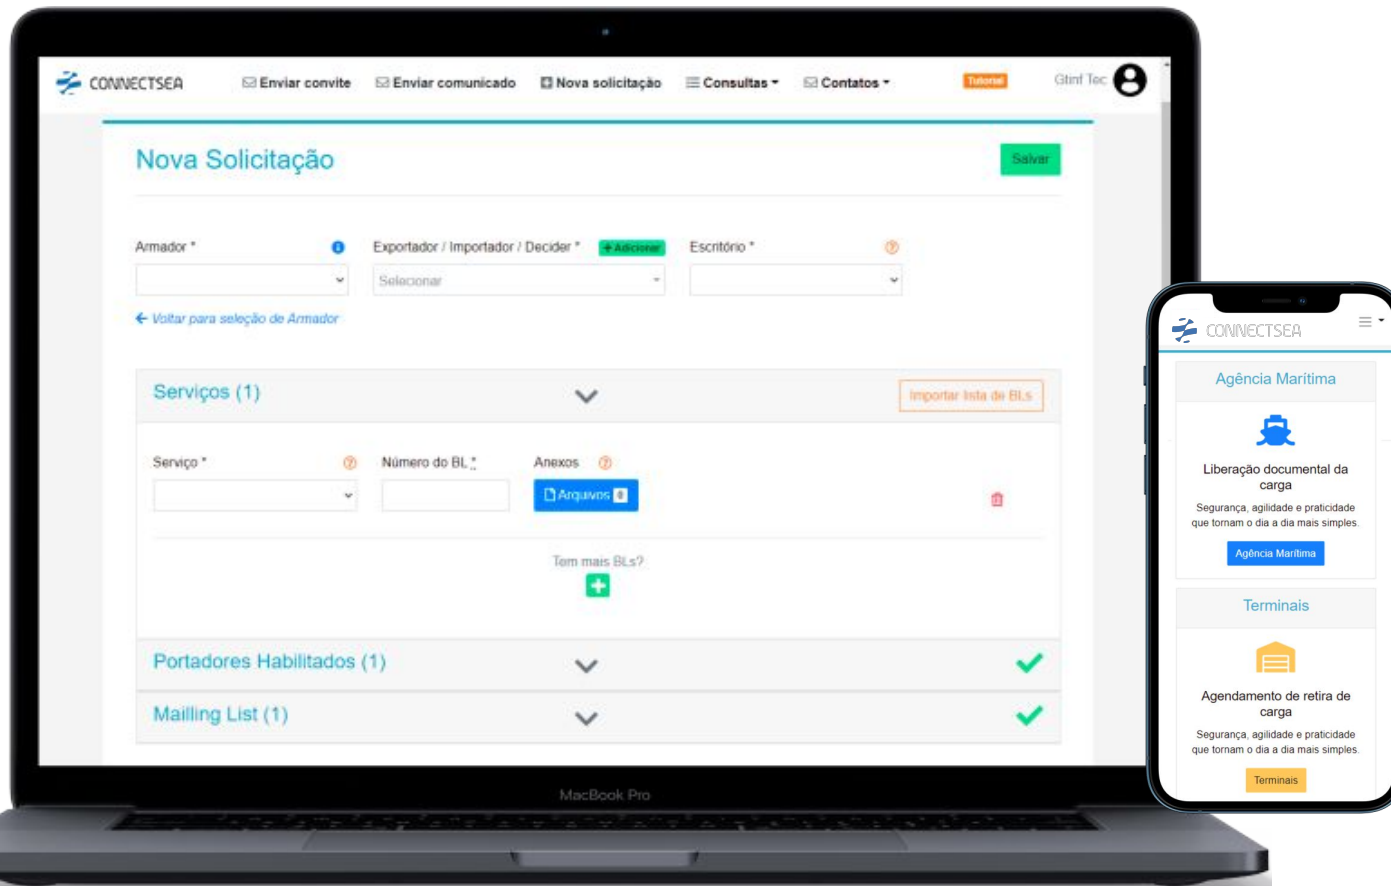

Our vision is to transform DocsApp from a "nice-to-have" to a "must-have" by offering a standardized and scalable solution for our partners.

Pains

Port logistics faces considerable challenges due to the extensive bureaucracy involved in cargo clearance. The diverse processes adopted by each shipowner in different locations and the limited level of digitalization and system integration contribute to operational and economic inefficiency. This situation results in prolonged and complex processes for stakeholders, negatively affecting the fluidity of the logistics chain.

The Solution

DocsApp is the ideal solution to simplify and expedite the document clearance process, offering a global infrastructure for document services in shipping agencies.

With DocsApp, we aim to standardize processes, increase efficiency, and reduce costs for our clients. Our robust and reliable platform effectively meets the demands of the sector, promoting a significant transformation in document management.

Some DocsApp results

Less Paper

Reduction of approximately 10 sheets per BL processed through DocsApp.

Zero Lost Trips

Zero lost trips. Before DocsApp, 1 in 20 processes required returning with additional or adjusted documents.

Less Time

Reduction of approximately 12 minutes in document analysis time per BL.

Shorter Lines at Counters

During peak hours, the average time at counters was reduced from 60 minutes to 10 minutes.

Zero Billing Errors

Zero billing errors for BL fees (agency vs. shipowner). Before DocsApp, an average of 7% of BLs were billed incorrectly.

More Audit/Info

All logs and information related to cargo clearance are just a few clicks away. An intangible benefit.

**Approximate Annual
Savings of
BRL 220.000,00**

(considering 100,000 BLs processed through DocsApp)

DocsApp Differentials

1

Active Base

We have a large base of active and satisfied shippers and dispatchers, reflecting the product's effectiveness and reliability.

2

Experience

More than five years of successful operation with continuous evolution and adaptability to market demands.

3

System Integration

Robust integration capability, seamlessly connecting with a wide range of existing systems and platforms in the market.

Total Security

With **ConnectSea**, you can have complete confidence in the protection of your information and the security of your transactions.

Data Protection

End-to-end encryption guarantees the integrity and confidentiality of information throughout the logistics process.

Robust Authentication

Multifactor authentication ensures that only authorized users have access to sensitive data and platform functionalities.

Continuous Monitoring

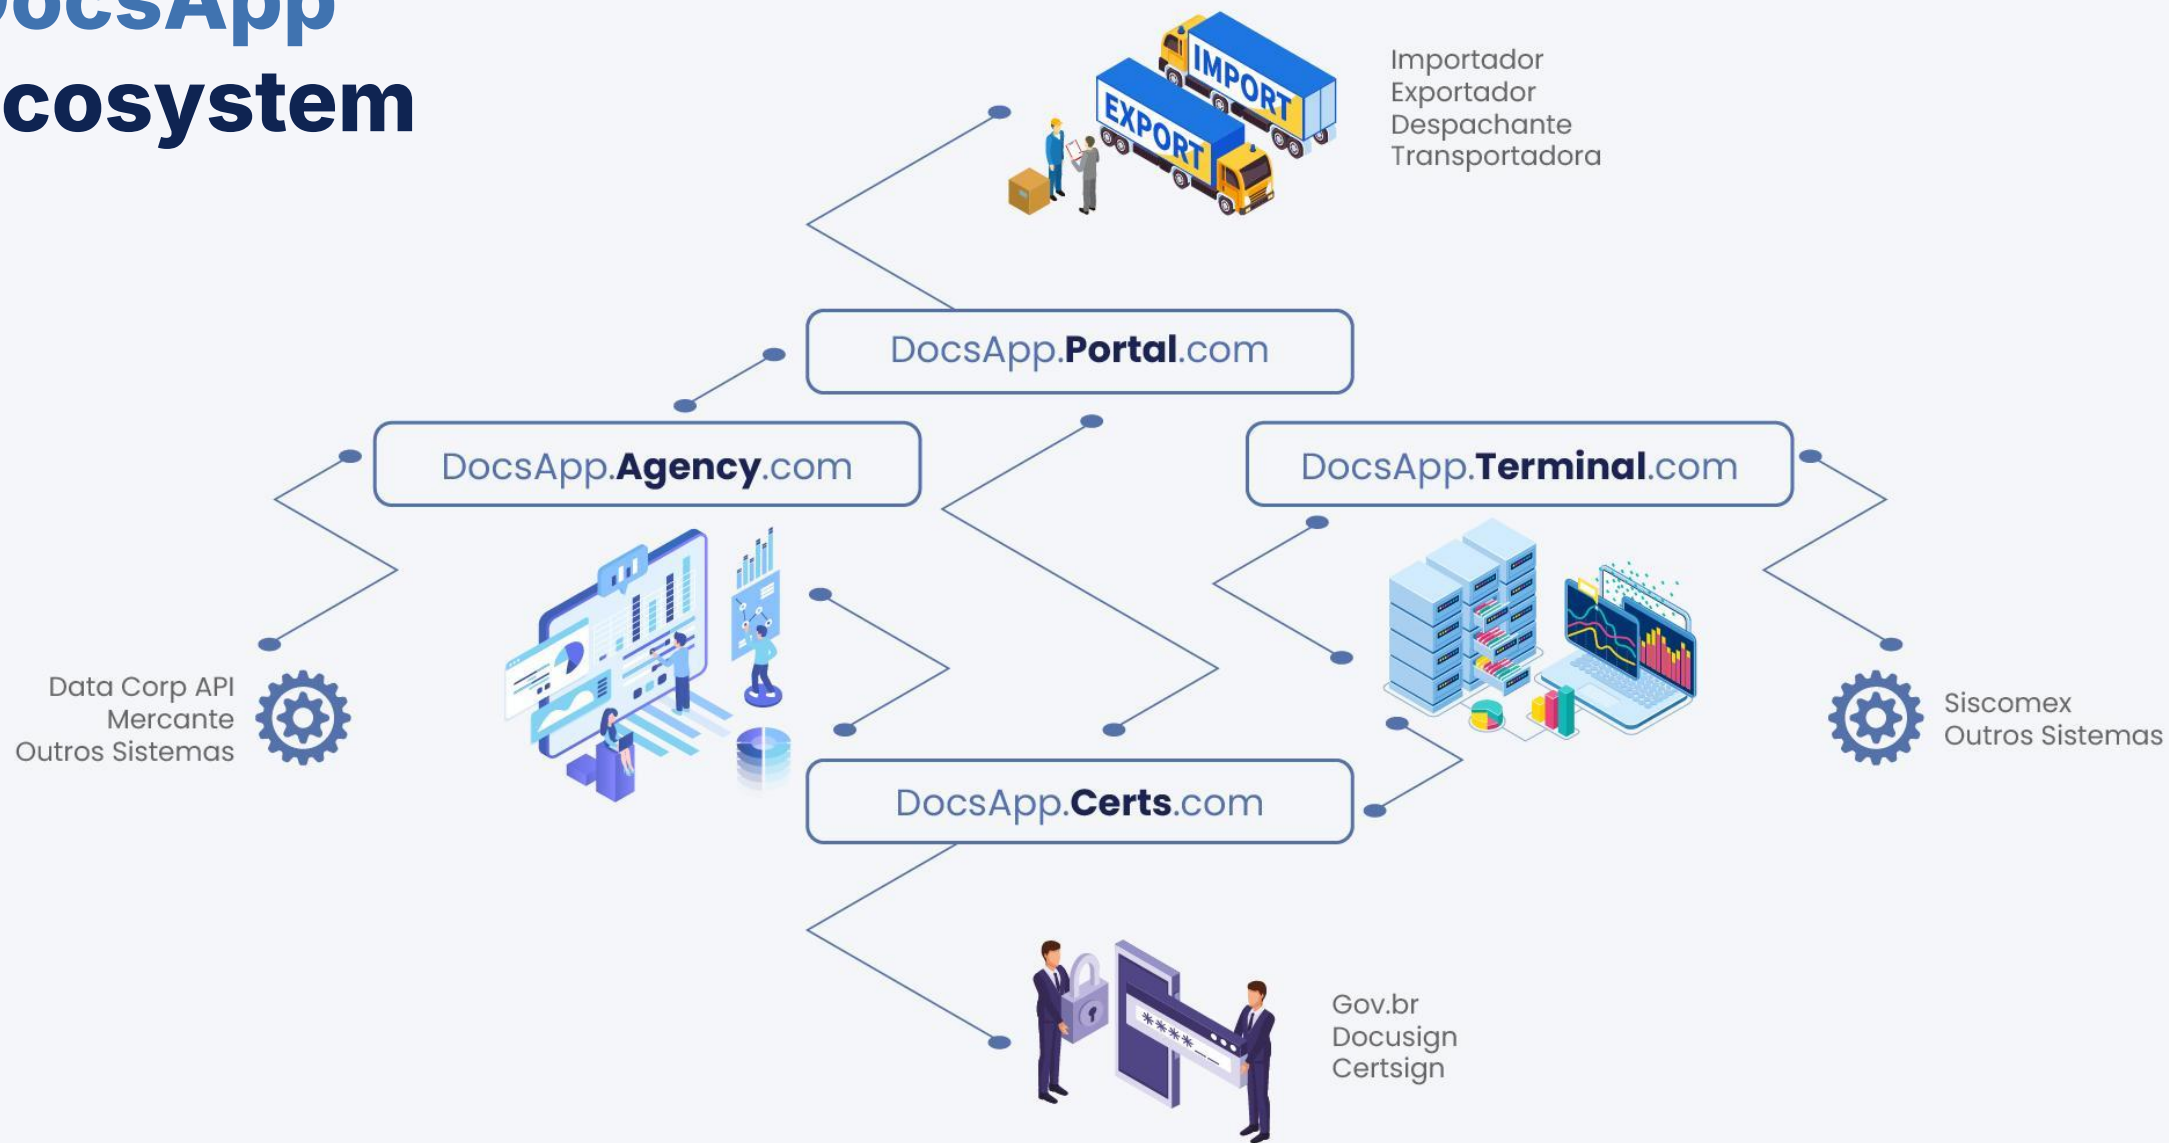

Constantly monitoring and updating to detect and neutralize potential threats, ensuring the continuity and security of operations.

Transaction Security

Strict security protocols ensure that all transactions and document processes are conducted securely and reliably.

DocsApp Ecosystem

Main features

DocsApp Agency

Digital or scheduled BL services

Integration with Mercante for data input

Support for multiple shipowners

Automatic CE release

Online payments

Performance dashboard

Billing control

Service evaluation

Main features

DocsApp Terminal

DTA Robot

Pre-arrival DTA notification

Customs clearance
(Averbação)

Support for multiple terminals

Scheduling for cargo pickup

Truck cycle

Main features

DocsApp Certs

Legal certification
control of the user

User pre-expiration
notification

Power of
attorney templates

Integration for
digital signatures

Available Integrations

MATERA

Among others

ENHANCING GLOBAL
SEA CONNECTION.
